WORK EXPERIENCE

Frontend Developer
Zuri Chat, Lagos Nigeria
Aug 2021- Present

Zuri Chat is a technology web3 communication platform similar to slack. which is fully integrated to work with the DAO/Web3 decentralized system. It makes remote working easy and smooth and also uses NFTs.

- I work as a frontend developer in Zuri chat
- We built zuri chat from the scratch, integrating all features and ensuring it functions properly.
- I work with other developers performing different functions to ensure zuri chat runs well.
- I built the push notification using centrifugal
- I implemented the features pages
- I teamed up with other developers to implement themes, dark and light mode and other theme selected colors on every zuri chat page.
- I also was the secretary in charge of the DAO/web3 sub team in ensuring the process is integrated as needed.
- I am an active participating member of other sub-teams involved in clean up of the site and fixing of bugs
- I am part of the quality control team to ensure nothing sub- standard is used.

Software Support
Zanibal LLC, Lagos
Jan 2021 - Dec 2021

Zanibal LLC is a Financial technology company that proffers solutions selectively to the Capital Market.

- I was involved in Batch script Integration
- Pent testing and bugs identification

- Data Analysis MySQl and Postgres database for client software solution.
- Resolution of Client issues regarding the fintech software solution
- Worked on different client databases to ensure system security and proper functioning
- Make use of the Amazon web server (AWS) to host applications
- Train clients on the use of software solutions to provide Send out SQL query based reports to clients
- Send out notifications written as batch scripts, document scripts and templates
- In charge of client on-boarding and settling into the use of the Zanibal software solutions offered
- Work on different system modules to provide updates on newly implemented features
- Document and mass inform clients of newly added features on the system.

Software Engineer Intern
HNG, Lagos Nigeria
Aug 2021- October 2021

- Building products with the React frame work, JavaScript, css modules
- Integration with the backend by consuming APIs and hooking
- Worked with different teams to see the product comes up in time
- worked in an agile system involving a lot of collaboration
- Strengthened my use of React.Js
- The internship was very demanding and really tasking. Learnt a lot and how to find and fix bugs
- Ensured every page was responsive and pixel perfect
- Worked on pages functionalities views
